Education:

2000 – 2005: Bachelor degree in computer sciences. Ivano-Frankivsk National Technical University of Oil and Gas (IFNTUNG), faculty of automation and computer technologies

Work Experience:

2013 – Current time: Freelance web-developer and UI/UX designer

For the last two years I've been working on diverse projects: commerical web solutions, social startup and some of private works. I have worked as part of a team or independently and have managed contractors in one of the projects. Depending on a project, my main responsibilities were: planning, designing, coding or coordinating the work with the purpose to achieve requested results at the best timing and quality, by using simple but efficient techniques. For development I was mostly using HTML, CSS3, JQuery.

Other responsibilities:
- Customer requirements analysis
- Responsive Front-end development
- UI and UX design for web applications and websites
- Cross-browser support
- 2D and 3D graphics creation
- Beta-testing, optimization
- Websites maintanance
- Project management role in one of the projects
- Leading geographically dispersed online team

2010 – 2013: Front-end developer and 3D graphic designer at "Freedomes", Szczecin

- Web-development for the corporate website (front-end) html, css, php, javascript)
- 2D and 3D graphic design
- Beta-testing, optimization
- Continuous improvements to the company website

2007 – 2010: 3D-designer, Web-developer at "ECA architects and associates", Cyprus

- Web-development of CMS based websites
- Creating Mash-ups and using external APIs (Google Maps), SEO
- Website scaling, beta-testing, optimization of page load
- Development of architectural projects in 3D Studio Max
- Creation of 3D animated advertisements

2005 – 2007: Graphic designer and photographer at "Sako", Ukraine

- Design of marketing materials
- Salon and correspondent's photography
- Photo design

Languages:
- English – Intermediate
- Polish – Intermediate
- Ukrainian and Russian - Fluent
